Hot Peppers, Halloween, Cooking, Music, Novelty programming languages

# Bryan Hoffman

### MPX - Portland, Maine
*Software Engineer*
June 2024 - Present

- **Software Development**
  - Developed and deployed document rendering applications using PHP and PDFLib for large-scale commercial use, such as financial statements and insurance ID cards.
  - Created modular libraries to parse various data formats, ensuring seamless integration with industry vendor systems.
  - Collaborated with business analysts and project managers to align technical deliverables with business objectives and meet tight deadlines.
- **Application Maintenance**
  - Maintained and enhanced a document scanning application using C# and the Windows Forms API, ensuring reliable performance.
- **Documentation**
  - Standardized and documented technical processes using Jira and Confluence to improve team efficiency and knowledge sharing.

### Raymond F. Kravis Center - West Palm Beach, Florida
*Software Engineer*
January 2023 - June 2024

- **Legacy System Upgrades**
  - Led the migration to Git version control and implemented CI/CD pipelines using Azure DevOps.
  - Resolved critical security vulnerabilities and established automated browser testing, reducing bugs and improving QA.
- **SQL and Reporting**
  - Developed custom reports using PHP and SQL Server, collaborating with multiple departments to deliver actionable insights.
- **Infrastructure Management**
  - Managed Docker environments for Selenium services, Linux email relays, and Windows Server VMs hosted on-premises in VMware.

### Radiant Software - Winter Park, Florida
*Freelance Software Engineer*
January 2023 - June 2023

- **C# Software Integration**
  - Developed a C# module integrating QuickBooks and other accounting systems, leveraging dependency injection for flexible backend integrations.
  - Enabled Radiant Software to offer multi-platform accounting solutions, driving revenue growth.

### pr.business - Boca Raton, Florida
*Software Engineer*
January 2021 - January 2023

- **Scalable Web Applications**
  - Built a scalable website builder using Go and Web Components, reducing server costs by enabling 100x more sites per server.
  - Integrated Salesforce and GitLab APIs to streamline onboarding and improve user experience.
- **Server Administration**
  - Managed over 2000 websites hosted on 11 Ubuntu VMs, ensuring system reliability through routine backups and server maintenance.

### Wallflower Merchandise - Delray Beach, Florida
*Automation Engineer*
November 2020 - December 2021

- **Automation Solutions**
  - Developed a React application to streamline T-shirt design, reducing manual effort by automating the image generation process.
  - Implemented a Python service to automate daily warehouse pick lists, improving efficiency and accuracy.
- **Data Management**
  - Built a Google Sheets-based data entry form using JavaScript APIs, reducing errors in client-provided data.
